Professional Summary

Motivated Software Engineering student at Landmark Metropolitan University with a strong foundation in Java, Python, and JavaScript, as well as database management. Passionate about writing clean, efficient code and solving real-world problems through technology. Experienced in academic projects spanning web development, mobile applications, and data analysis, demonstrating strong analytical thinking and keen attention to detail. Eager to apply theoretical knowledge in a professional environment, learn from experienced engineers, and contribute to innovative solutions. Fluent in English with moderate proficiency in French, and possesses excellent teamwork and communication skills.

Employment History

Software Engineer, TechBrains. Douala, Littoral
Jul. 2024 - Sep. 2024

To clarify my background, my professional experience stems from a dedicated internship at TechBrains Engineering and Consulting. Although it was an internship, I was entrusted with core responsibilities including frontend development, backend support, and leading a team of fellow interns. I successfully contributed to the delivery of fully functional software solutions that met project requirements.
